

WHAT IS ITAFOS CONDA?

Itafos Conda is a phosphate mine and fertilizer manufacturing facility in Caribou County that has been continuously operating for 33 years.

Itafos purchased the Conda facility from Agrium in 2018 and continues the great work and traditions of the highly respected phosphate facility.

EMPLOYMENT & ECONOMY

500+ people make up the Itafos Conda team

- 286 employees work at the facility
- 220 are contracted

That is more than 15% of the Caribou County workforce and upwards of \$50 million in annual wages and benefits each year!

As one of the largest employers in the area our economic footprint is impactful.

\$367 Million Overall Economic Impact

\$180 Million Locally

\$155 Million Throughout the Rest of Idaho

\$27 Million State and Local Taxes Generated Annually

\$5 Million in Fees and Royalties

At Itafos Conda, we are more than just an employer, we are proud of our commitment to the communities where we live and raise our families.

We donate approximately \$100 thousand per year to local educational institutions, youth activity groups, senior citizens, healthcare groups, agriculture, and various community projects and sponsorships.

OUR FUTURE - HUSKY 1/NORTH DRY RIDGE

Enough ore to allow for the continuation of responsible mining, job security and an even greater economic boost.

Our environmental impact will be minimized through:

- Re-establishing waterways
- Reclaiming all areas practical
- Utilizing existing facilities and previously impacted areas
- Implementing stormwater controls
- Using natural cap and cover
- Managing phosphoria formation overburden

GOOD FOR IDAHO

Miners and support teams are among the highest-paid industrial or service employees in Idaho, and in competing states. At Itafos Conda, we support Idaho businesses by sourcing contractors, materials, services, and supplies from local providers. We are a part of the fabric of the community, as we hire locally and draw natives back to the Gem State.
