

7 CONCLUSIVE SUMMARY

The Proposed Action is designed to maximize the recovery of economical phosphate ore within Federal Phosphate Leases and Off-Lease Areas. This MRP collectively provides the information required under 43 CFR 5392. Additionally, this MRP documents a rational method of mineral extraction while minimizing environmental impacts. As provided by the Mineral Leasing Act of 1920, and by the rights provided to the lessee in the original leases and subsequent lease readjustments, Itafos requests authorization and approval to execute this MRP.
